EDUCATION

MICROVERSE

Remote Full Stack Software Developer, Full Time

- Mastered algorithms, data structures, and frontend development using React and Redux.
- Developed advanced skills in remote pair-programming, Gitflow, and international collaboration.

JOMO KENYATTA UNIVERSITY OF AGRICULTURE AND TECHNOLOGY

Certificate in Technology

- Studied data structures and frontend/backend integration using Spring Boot and MySQL.
- Participated in collaborative projects using Git-based version control and Agile methodologies.

EXPERIENCE

MICROVERSE

Remote

Full Stack Software Developer

- Mentored 10 junior developers weekly on Zoom and Slack, improving productivity and code quality.
- Utilized leadership and communication skills to foster professional growth among mentees.

Nairuby

Remote

Full Stack Software Developer

- Conducted thorough code reviews for junior developers, ensuring adherence to best practices.
- Facilitated feedback sessions to improve code maintainability and usability.

HeadStarter AI

Remote

Full Stack Software Developer

- Collaborated with a diverse team to design and implement seven projects in four weeks.
- Enhanced teamwork and communication skills by contributing to code reviews, stand-ups, and brainstorming sessions.

PROJECTS

Pantry Tracker | *Next.js, Tailwind CSS, Material UI, AI Integration*

- Built an advanced kitchen management app that tracks pantry items, generates recipes, and plans meals efficiently.
- Integrated AI to provide personalized recipe suggestions and improve meal planning.
- Used Next.js, Tailwind CSS, and Material UI to create a modern and responsive interface.

Multilingual Weather Dashboard | *React, HTML, CSS, JavaScript*

- Developed and launched a straightforward weather application using React that enables users to view current weather and forecasts via the OpenWeatherMap API.
- Implemented features such as current weather display, 4-day forecast, and search functionality, enhancing user experience through intuitive design.
- Utilized HTML, CSS, JavaScript, and React to create a responsive and user-friendly interface.
- Live Demo: [Multilingual Weather Dashboard](#)

Wheels-4-Rent | *React, Ruby on Rails, CSS, JavaScript, PostgreSQL, RSpec*

- Developed a full stack car rental web app, enabling efficient reservation and inventory management.
- Utilized React, Ruby on Rails, CSS, JavaScript, PostgreSQL, and RSpec.

TECHNICAL SKILLS

Languages: Ruby, Java, SQL, JavaScript

Frameworks: React, Redux, Ruby on Rails, Spring Boot, RESTful APIs

Databases: MySQL, PostgreSQL

Tools: Linux, Docker, Git, GitHub, Postman, RSpec, Agile Methodologies

Soft Skills: Remote Collaboration, Communication, Problem-Solving
